Affordable
+ Eco-Friendly
= Shipping Solutions

ChemLogix Expertise

Affordable Eco Friendly Shipping

Since taking over the BulkTainer operation from Union Pacific Railroad in April 2008, ChemLogix has utilized their logistics expertise to streamline and enhance the operation. BulkTainer customers continue to have access to state-of-the-art ISO tanks and equipment, while benefiting from lower rates and an increased focus on customer service.

ChemLogix BulkTainer service is not only substantially less expensive than long haul tank truck, it also reduces the associated environmental and safety risks. **A single intermodal train takes up to 280 trucks off our highways**, reducing traffic congestion and pollution in the process. Combining the convenience of a tank truck and the economy of rail transportation, our bulk liquid intermodal provides environmentally friendly, fast and easy service.

BULK TAINER

Your Shipping Solution

ChemLogix delivers door-to-door service solutions, assuming complete responsibility for delivery from origin to destination.

Benefits include:

- Up to 40% savings utilizing intermodal vs. shipping over the road
- All inclusive door-to-door management of intermodal container shipments
- Specialized ISO containers providing for payloads up to 45,000 lbs and ease of use for loading and unloading personnel
- Volume purchasing of rail, tank truck, depot and tank cleaning services ensuring lowest responsible cost per load
- Intermodal facilities and carrier selection based on performance, experience and safety, not price alone, resulting in consistent, reliable service to our clients
- Infrastructure and assets to ensure equipment availability where and when it is needed
- Ability to utilize the container throughout the entire route of movement, eliminating the need to transfer your product and maintaining the integrity of your shipment

With a single contact for booking and tracking orders, our seamless door-to-door domestic and international transportation is reliable, safe and economical.
