

## THE COMPANY: AT-A-GLANCE

With the globalization of supply chains, ever evolving regulations and a shortage of suitable carriers, Chemical companies face logistics as one of their greatest challenges. When combined with the nature of most chemical products – usually heavy, bulky, difficult to store and often hazardous – some companies may find that the costs of shipping, warehousing and transporting chemicals can even exceed the cost of manufacturing.

### Solving the Chemical Industry's Logistics Challenges

ChemLogix is a leading provider of chemical industry consulting, TMS technology, and comprehensive transportation management. We are dedicated to solving our customers' most vital logistics challenges by leveraging chemical industry expertise, best-of-breed technology and a personalized, high-touch approach to deliver measurable, sustainable value. Through our dedicated team of logistics management professionals and web-based technology, ChemLogix enables companies to reduce total costs, increase customer satisfaction, gain real-time visibility, and rapidly evaluate and deploy innovative supply-chain management initiatives.

*"ChemLogix is driven by the passion to create true, sustainable economic value for our clients."*

– Steve Hamilton, CEO, ChemLogix

### C|3PLUS – Our Formula for your Success

ChemLogix delivers both "point" and "end-to-end" logistics solutions through C|3PLUS, our unique business model that combines the efficiencies of outsourcing with strategic insights and industry-leading best practices to deliver world-class logistics performance for chemical organizations. Through C|3PLUS we are able to offer services that transcend those of the average 3PL or logistics solution provider. Services include:

- On Demand TMS Technology
- Customized Logistics Management (Outsourcing)
- Supply Chain Consulting
- Freight Rate Benchmarking and Procurement
- International Mode Management
- Intermodal – Box and Bulk Tank Container
- Rail Fleet Management
